Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. As this fund is invested in a particular country, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate.

Fund Strategy

Our investment strategy combines a deep understanding of key industry drivers and a robust bottom-up stock selection approach. We focus on Chinese healthcare companies with long-term growth potential based on industry leadership and competitive advantages, clear business strategies and transparent corporate governance. Our strategy not only looks at large market leaders but also small and medium sized companies, which have unique competitive advantages in different subsectors. The fund has higher exposure to CROs (Contract Research Organisations) and CDMOs (Contract Manufacturing Organisations), as well as selected exposure to pharmaceutical companies with strong pipelines of innovative drugs.

Past performance does not predict future returns. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.
